

Turnkey's NAV4Hire... A Microsoft Dynamics NAV Solution

Introduction

Turnkey Computer Technology has over 30 years experience of developing business systems from our headquarters in East Kilbride, on the south side of Glasgow. We have an excellent reputation for developing highly functional and robust systems using Microsoft Dynamics NAV (Navision) and our abilities have been recognised by Microsoft awarding Turnkey Certified Gold Partner status in 2005.

Our hire management system, NAV4Hire, has been developed and refined by Turnkey in association with a number of highly respected hire companies. It is therefore truly representative of the day to day requirements in this complex business environment.

The system caters for the hire and re-selling of all manner of tools, plant and equipment, the set up of hires or contracts uniquely created per customer, invoicing and workshop management. It also provides a wealth of management reporting and documentation to ensure a thoroughly professional business process is maintained.

What sets NAV4HIRE apart from other offerings is its flexibility – the system can be altered to work the way you do, rather than you having to alter your business processes to suit the system! This capacity for change is integral to the solution and ensures that business changes can be incorporated through the life of the system.

Some of the key features include:-

Plant/ Tools

Your most precious asset:-

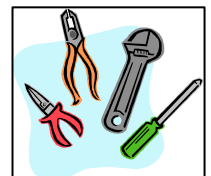

- Maintain full plant and equipment records.
- What's on hire, where & for how long?
- What are we charging?
- Re-sell or hire? Manage both processes.

Repairs/Workshop

Manage your repair costs:-

- What's in the repair shop?
- What has it cost us, and are we charging the last hirer?
- If ours is it making money or should we be getting rid of it?
- If not ours, is it automatically invoiced?

Paperwork

Maximize your operating efficiency:-

- Customer accounts & contracts easily maintained.
- Correct rates automatically applied
- Hire invoices raised quickly and easily.
- Charging mistakes eliminated.
- Sales invoices raised for sold items.
- Repair charges raised where appropriate.

Accounting

NAV4Hire includes a full accounting solution:-

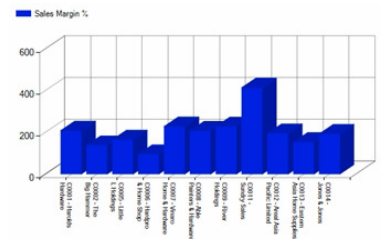

- Built around Microsoft Dynamics NAV (Navision), Microsoft's No. 1 selling accounting solution
- A complete package including (as required)
 - Accounts – profit/loss and balance sheet
 - Sales & Purchase Ledgers
 - Bank Account management
 - Payroll and HR
- Totally linked hire/repair/accounting solution

Performance

Concentrate on running your business:-

- Eliminate repetitive tasks & therefore mistakes
- Utilise unskilled staff
- Be free to focus on running your business
- Reporting
 - What business is profitable, what's not?
 - Accurate reporting helps you decide.
 - Key Performance Indicators (KPI) provide the above at a glance.

The above is simply a snapshot of some of the functionality available.
